

Activity Two: the extended republic and the Constitution

Student Name _____ Date _____

Twin cures to the dangers of majority faction

Teacher directions: Print the following constituency cards, name tags, and list of possible bills to be introduced during the activity. Make sure that you have one set of cards for each student.

H.R. Bill #1. A bill to levy a tax on all tobacco and alfalfa imported into Pennsylvania from North Carolina. This bill would:

1. Benefit Virginia tobacco and alfalfa farmers, who will corner the Pennsylvania market and eventually raise prices
2. Benefit commercial shippers in New York who transport tobacco and alfalfa from Virginia to Pennsylvania
3. Harm North Carolina tobacco and alfalfa farmers by cutting them out of the Pennsylvania market
4. Harm consumers and retailers in Pennsylvania (Central counties) by raising the price of imported tobacco and alfalfa
5. Harm consumers and retailers in Massachusetts (Western counties) and New Jersey (Northern counties) who will likely also pay higher prices for tobacco and alfalfa imported from Virginia

H.R. #2. A bill to levy a tax on all raw lumber imported into Virginia and Pennsylvania, or exported from Pennsylvania. This bill would:

1. Benefit New York (Northern counties) and Connecticut commercial shippers who buy boats from Massachusetts
2. Benefit businesses in Massachusetts (Eastern counties) that make and sell boats for commercial shipping to Virginia, Delaware and Maryland, and by allowing them to corner the market in their own state on fishing boats (cutting out Pennsylvania)
3. Benefit retailers in Massachusetts (Western counties) who purchase and sell wood furniture made in New Jersey
4. Harm fishing boat and commercial ship builders in Pennsylvania (Eastern counties)
5. Harm Virginia (Western counties) businesses that make boats for commercial shippers
6. Harm commercial shippers in North Carolina, Pennsylvania (Eastern counties), Delaware and Maryland who buy their boats from Virginia (prices for boats from Massachusetts will eventually go up)
7. Harm fishermen in Rhode Island and Connecticut who buy fishing boats from Pennsylvania
8. Harm business in New Jersey (Southern counties), New Hampshire, Connecticut and North Carolina who import raw lumber from Pennsylvania to make furniture
9. Harm consumers and retailers in Georgia who buy and sell wood furniture made in Connecticut

H.R. Bill #3. A bill to levy a tax on corn, potatoes, beef and pork imported into Virginia, South Carolina and Georgia from Massachusetts and New York. This bill would:

1. Benefit farmers in Pennsylvania (Western and Central counties) who sell most of their corn, potatoes, beef and pork to South Carolina, Virginia and Georgia
2. Harm Massachusetts (Western counties) and New York (Western and Southern counties) corn and potato farmers who export most of their crops to South Carolina and Georgia
3. Harm New York (Western counties) cattle and hog farmers, who export most of their beef and pork to Virginia
4. Harm consumers and grocers in Virginia, South Carolina and Georgia, who import more than half their corn, potatoes, beef and pork from Massachusetts and New York
5. Harm commercial businesses in South Carolina and Georgia that transport potatoes and corn from New York to Georgia and South Carolina

H.R. #4. A bill to levy a tax on all raw cotton imported into New York from Georgia. This bill would:

1. Benefit cotton clothing manufacturers in Massachusetts (Western counties) who import cotton from Georgia (prices will go down)
2. Benefit South Carolina cotton farmers, who export cotton to clothing manufacturers in New York
3. Benefit manufacturers of wool clothing in Pennsylvania (Central counties), Delaware and New Jersey (Northern counties) who can sell more product as a substitute for cotton clothing
4. Harm cotton clothing manufacturers in New York (Northern counties) who import cotton from Georgia (prices will go up)
5. Harm cotton farmers in Georgia
6. Harm consumers and retailers in New Hampshire who buy and sell cotton clothing made in New York

Senate Bill #1. A bill to issue more paper money, effectively doubling the amount of paper money currently in circulation. This bill would significantly deflate the value of paper money, which would:

1. Benefit farmers, who can charge more for their produce and goods; farmers can also repay their loans to banks at a lower dollar value.
2. Harm banks, who will not get the fair return on principle and interests from their loans from farmers
3. Harm all manufacturing, commercial and retail businesses, who will have to pay higher interest rates on loans so the banks can make up for their losses on loans to farmers

Senate Bill #2. A bill to establish a ban in Connecticut and New Hampshire on the sale of all wood furniture manufactured in and imported from North Carolina. This bill would:

1. Benefit furniture manufacturers in New York (Western Counties), New Hampshire and Connecticut, who could sell more furniture in Connecticut and New Hampshire
2. Benefit consumers and retailers in New Jersey (Northern counties) who buy and sell wood furniture made in New York
3. Harm manufacturing businesses in North Carolina that make and ship wooden furniture to Connecticut and New Hampshire
4. Harm consumers and retailers in Pennsylvania (Central counties) who buy and sell wood furniture made in North Carolina (prices will go up)

U.S. HOUSE OF REPRESENTATIVES	U.S. HOUSE OF REPRESENTATIVES
<p style="text-align: center;">John Gilmer</p> <p style="text-align: center;">Virginia (Western counties)</p>	<p style="text-align: center;">Gerald Ellerby</p> <p style="text-align: center;">Virginia (Eastern counties)</p>
