Activity 4, Teacher Notes 2: Preparing for Research

Student Name __________________________________________________________ Date __________________________

The purpose of this lesson is to give students an opportunity to debrief their preliminary interview. The research they begin today will allow them to investigate the time period and events their veteran may have participated in.

Students can use Activity 4, Student Worksheet 2: Research Notes to guide them through the research process.

The research process is important, as the information students gain can be used to design relevant interview questions for the big day.
