

## **Essays in Visual History: Making Use of the International Mission Photography Archive**

### **Data Management Plan**

This grant will support a two-day conference devoted to the planning of an ongoing series of visual essays based on analyses of materials available in the International Mission Photography Archive ([www.usc.edu/impa](http://www.usc.edu/impa)). It does not propose research that will generate new data. The white paper that recounts the accomplishments of the workshop will be archived on the publications page of the [Center for Religion and Civic Culture](#). As they are completed, the visual essays that are the focus of the workshop will be published online and archived by the USC Digital Library, where they will be accessible at this address:
